Mariner Kit for use with HP Z440 Workstation  
(Tower configuration)

The HP Z440 Workstation is marine type approved by all of the major international marine Classification Societies when it is installed in conjunction with our Mariner Kit MS3060.

The MS3060 Mariner Kit affords protection against the effects of vibration and shock experienced in the offshore marine environment and has been type tested against IACS Unified Requirement E10 and the relevant sections of IEC60945 (see below right for test details).

This type approved combination of hardware and Mariner Kit can be used as the platform for your critical navigation, control, loading and general purpose applications (please check individual type-approval certificates for any restrictions).

**“Proven solutions for a demanding environment”**

## PRODUCT FEATURES:

- ◆ Achieve the performance you need with next generation Intel® Xeon® processors for up to 8 processor cores in one system
- ◆ Wide range of professional graphics solutions from professional 2D to mid-range 3D
- ◆ Maximise your time and increase your capabilities with USB and SATA ports, plus lightning-fast data transfers using optional Thunderbolt™ 2 technology
- ◆ A brand new tool-free chassis boasts low acoustics, single integrated Gb Ethernet and more
- ◆ Reduce boot up, calculation, and graphics response and revolutionise how your HP Z440 handles large files with the HP Z Turbo Drive, a remarkably fast and innovative storage solution
- ◆ You'll never run out of juice with two power supply options: 525W & 700W
- ◆ Take multitasking to a new level with support for up to eight displays
- ◆ Optimise this HP Z440 for peak performance. HP Performance Advisor configures your system with updated settings and drivers to help maximise performance
- ◆ Up to 128GB DDR4-2133 ECC registered SDRAM
- ◆ Two full-height PCI Express Gen3 x16 slots; One full-height PCI Express Gen3 x8 slot (open-ended); One full-height PCI Express Gen2 x4 slot (open-ended); One full-height PCI Express Gen2 x1 (open-ended); One full-height PCI slot
- ◆ Four front, six rear and two internal USB ports
- ◆ ENERGY STAR® certified and EPEAT® registered configurations available
- ◆ Worldwide product availability
- ◆ Protected by HP Services, including a 3 years parts, 3 years labour and 3 years onsite service (3/3/3) standard limited warranty

This Mariner system is type tested against the consolidated, 'worst-case' requirements of all the major international marine Classification Societies:

**ABS, BV, CCS, DNV GL, KR, LR, NKK, PRS, RINA**

Type-tests included on the test programme are as follows:

- > Vibration, Shock, Static and Dynamic Inclination
- > Dry & Damp Heat, Low Temperature
- > Acoustic Noise, Compass Safe Distance
- > High Voltage, Power Supply Variation & Power Supply Failure
- > Conducted LF & RF, Electromagnetic Field
- > Radiated & Conducted Emissions, Electrostatic Discharge
- > Insulation Resistance, Burst / Fast Transients
- > Surge Immunity, Access to Dangerous Voltages

## OPERATING GUIDELINES

Although all of our equipment is tested against extreme environmental conditions for the purposes of marine type approval, installation should take into account the following guidelines:

- Keep the equipment away from excessive moisture, direct moisture and the extremes of heat and cold and, wherever possible, ensure that the equipment is within the manufacturer's specified operating/non-operating ranges:

	Operating	Non-Operating
<b>Temperature</b>	+5° to +35°C (+40° to +95°F)	-40° to +60°C (-40° to +140°F)
<b>Humidity</b>	8% to 85% (non-condensing)	8% to 90% (non-condensing)

- Leave at least 15.2 cm (6-inch) clearance on all vented sides of the equipment to permit the required airflow
- Never restrict airflow into the equipment by blocking any vents or air intakes
- If the equipment is to be operated within a separate enclosure, intake and exhaust ventilation must be provided

By following these guidelines you will maximise the life of your equipment and minimise service costs.
