

NSI and Cursor Controls announce a new range of advanced touchpad solutions. These touchpads provide smooth and precise cursor control using the latest and most advanced touch sensing technology. When installed, the design allows for **easy cleaning, decontamination, and maintenance**, ensuring continued optimum performance and operation under the harshest of conditions.

- **Fully customisable** functionality and gesture mappings, layout, size and appearance – including custom branding options
- IP65 sealing : Tolerant to moisture, water and liquid contaminants
- Solid state sensing technology - no moving parts
- Haptic and audible feedback - function specific
- Multi-finger gesture support

Standard 6" touchpads with 8 shortcut keys

NSI offers 2 standard, readily available, 6 inch touchpad versions with 8 shortcut keys, USB output and a glass overlay :

[Desktop Touchpad - Type TPD-55A326](#)

The touchpad is enclosed within a plastic case which, combined with an overmolded cable, offers an IP65 sealing solution and added protection against potential impact.

[Panel mount Touchpad - Type TPP-55A1A6](#)

Metal mounting bracket for front panel mounting including a rim around the glass edge for added protection and IP65 sealing capability. An OEM version is also available on request.

8 shortcut keys are located at the top of the touchpad module. These utilise capacitive touch sensing technology and incorporate frequently used functions such as Cut, Copy & Paste, cursor resolution adjustment etc., as well as a panel lock feature to facilitate cleaning/decontamination of the device.
